## CAR&CARE X-40 DETAILED IN-VEHICLE CLEANER

It can be used safely in fabric, leather, artificial leather and all kinds of upholstery fabrics. Cigarette smoke stains, ink, oil, dirt etc. very effective in cleaning tough stains. Does not damage the upholstery. It is applied directly on the stain. After waiting for a while, it can be wiped with a cloth or microfiber cleaning cloth. It can be used in carpets and detailed cleaning that does not go out with washing. It is used for the detailed cleaning of the interior of the vehicle. It is economical because it is a concentrated product.

Used diluting with water 1/3 to 1/10 on average

## CAR&CARE C-LO ITCH, TAR AND ENGINE CLEANER

Thanks to its special formula, C-LO is a product that thickens when it is combined with water and resolves impurities such as stubborn oil, fuel, tar even on vertical surfaces. It effectively cleans all kinds of tar, tar and engine dirt in the car.

### PROPERTIES:

- Does not damage the surface and paint when removing heavy oil and dirt.
- The emulsion formed when mixed with water adheres to vertical surfaces and absorbs and cleans oil, dirt and tar.
- It cleans oil, tar, fuel, dirt and many coating materials from the surface without scrubbing and saves labor.
- It is economical and is used by diluting 1 part C-LO with 5 parts water.
- When diluted with water, C-LO forms a FIREPROOF/UNINFLAMABLE structure.
- Does not emit vapors like other solvent containing solvents and does not cause any discomfort to the user.
- Does not contain chlorinated solvent, acid or alkali.
- Has a fine scent and Easy to use.

### USAGE:

1. For best results, 1 part C-LO should be mixed with 5 parts water.
2. This mixture should be shaken until it has a thick consistency.
3. Apply a spray or cloth to the surface using a brush.
4. 10-15 min. Wait until
5. Remove oil and dirt from the surface with pressurized water.

## CAR&CARE CW 50 BRUSHED AUTO SHAMPOO

CW 50 is an auto shampoo that can be used for manual washing of all types of cars and road vehicles. It can be used safely thanks to its formula that does not harm auto paints. It is foamy, cleans without the need of strong scrubbing and shortens the washing time and saves money. Highly degradable in nature.

### USAGE AND QUANTITIES:

Provides Superior Paint Protection and Gloss. "Foam quality is high." Prevents lime residues. "Effective in Hard Water." Cleaning Power is High. It is a brushless foamy washing product that does not require brush and sponge and it is highly effective even in winter.

It saves time by making effective washing in a shorter time compared to brush washing. It is a concentrated product. Effective even in hard water, foam quality is high. In addition, it extends the life of the paint by protecting the paint on the vehicle surface from the harmful effects of ultraviolet rays. Thanks to its feature of dissolving oily dirt, it easily dissolves sooty dirt and sludges called traffic film on the vehicle. Traffic film, oily mud, dried mud stains, bird droppings and so on. stains removal power is high. After rinsing, it does not leave residue on the surface of the vehicle and prevents the formation of lime residues.

**APPLICATION:** Always should be mixed with water. Suitable for washing the entire vehicle

**QUANTITY OF USE:** 1 lt EX-80 is mixed into 50 lt water. Foam is applied on the vehicle with pressure machines. Wait for 5 minutes, rinse by spraying water with pressure water tank.

## CAR&CARE J-4292 STEEL AND ALUMINUM WHEEL CLEANER

J-4292 is used for cleaning and polishing wheel rims of dirt, asphalt tar, oils and brake lining dusts on all original, varnished and painted wheels (steel alloy nickel, magnesium, chrome, aluminum and normal wheels). It is also used for cleaning bicycles, ATVs, motorcycles, lawn mowers and metal tools. Thanks to its anti-static formula after use, it provides a resistant and polished surface on the rim surface against dust and contamination.

**APPLICATION:** Shake the product well before using and open the product cover and adjust the spray tip. Soak the rim with water. Squeeze the surface to be cleaned as far as necessary from a distance of 15-20 cm. Soften the dirt with a soft brush or a sponge. Wait 3 minutes to dissolve dirt, lining dust and dirt on the rim and drain the dirt with pressurized water (hose). Dry the rims with a clean cloth. Repeat the application, especially for built-in stubborn stains. It can be diluted 1: 1 - 1: 3 depending on the contamination.

## CAR&CARE L-35 LEATHER AND VINYL CLEANER

It cleans all kinds of plastic, leather and vinyl parts (ceiling, floor, seat) in the interior and exterior parts of the car and gives shine. Removes all kinds of organic and inorganic dirt. Refreshes the interior appearance of your vehicle. Gives shine. Helps remove stuck dirt. Provides easy cleaning. It can be used safely on many surfaces.

**USAGE AREAS:** L-35 car interior and exterior parts of plastic, leather and vinyl can be safely used as a cleaner.

**APPLICATION:** It is applied to the surface to be cleaned by spraying with spray or pouring on a clean cloth or sponge. The excess is wiped again with a clean cloth part.

## CAR&CARE RB-S TIRE POLISHER

POLIMOLE RB-S tire polisher is a premium quality product specially designed for polishing tires. Gives the tires a special looking black shine. It cleans, maintains and protects the tires with its special formula. Thanks to the special water-dirt repellents and silicone it contains, it provides antistatic effect and retards the contamination and prevents and prevents the yellowing and discolouration of the tires.

**APPLICATION:**

- Wash and dry the very dirty tires with POLIMOLE CW-150 shampoo
- Apply the product to the tires with the help of a sponge or a trigger spray.
- Drive the vehicle forward or backward to the untreated undercarriage and feed it thoroughly into all areas.
- When the same sponge is used in all applications, 100 vehicle tires can be made with 1 Liter product.
